

## Discover Ways to Save With SoCalREN

With a wide variety of services, the Southern California Regional Energy Network (SoCalREN) helps residents, businesses, and public agencies in Southern California save energy and money.

### Residential Program

SoCalREN provides information, resources, and programs to help residents save energy and money in homes and apartments throughout Southern California.

Information and Resources: [socalren.org/resources](https://socalren.org/resources)

### Multifamily Program

We offer financial incentives and technical assistance to help you make upgrades that save energy, plus provide a healthier, more comfortable living environment at your property. Eligible buildings must have a minimum of four units and must be served by Southern California Edison and SoCalGas®. Projects must include a minimum of three measures, be assessed by the program, and achieve a minimum 10% whole-building energy improvement.

### Multifamily Financing Program

Qualifying participants of the SoCalREN Multifamily Program can access project financing at preferred rates through a quick and easy application process.

Information and Resources: [socalren.org/multifamily](https://socalren.org/multifamily)

• (877) 785-2237 • [multifamily@socalren.org](mailto:multifamily@socalren.org)

### Residential Community Coordinator

Our team can attend events to help local communities and organizations provide energy efficiency and sustainability information to a variety of audiences.

## Public Agency Programs

SoCalREN takes a comprehensive approach to helping agencies complete energy efficiency projects. From designing performance specifications to project completion, our team offers a suite of programs to help identify energy-saving measures and works alongside agency staff—at no additional cost.

Qualifying agencies include cities, counties, school districts, water districts, sanitation districts, and other public agencies in the counties of Los Angeles, San Bernardino, Riverside, Ventura, Inyo, Imperial, and Mono, as well as portions of Orange, Kern, Tulare, Santa Barbara, and Kings counties.

Information and Resources: [socalren.org/interest](https://socalren.org/interest) • [info@socalren.org](mailto:info@socalren.org)

### Project Delivery Program

Our team guides public agencies from start to finish through energy efficiency projects. We offer audit and technical services, financing support, simplified procurement, and incentive application support.

### Metered Savings Program

Another way to access SoCalREN's Project Delivery Program support services, this program uses normalized metered energy consumption (NMEC) to measure energy savings at the meter.

### Revolving Loan Fund

This program provides short-term, up-front construction financing for small to midsize projects at 0% interest. It can be used to bridge the delay between construction and On-Bill Financing (OBF) or other sources of funds not immediately available.

### Pathway to Zero

In conjunction with our energy efficiency programs, we offer energy-saving opportunities for facilities in disadvantaged communities.

---

## Workforce Development Program

SoCalREN helps current and future members of the workforce learn job skills to advance their careers now and in the future.

Information and Resources: [socalren.org/workforce](https://socalren.org/workforce)

### Small Minority Businesses

We provide small minority contractors with the opportunity to expand their knowledge, skills, and career opportunities. Any licensed small minority contractor (as defined by the U.S. Small Business Administration) is eligible to apply for the E-Contractor Academy offered by Los Angeles County through the Emerald Cities Cooperative. The course is offered at no cost to students and requires attendance at seven seminars to graduate.

### STEAM Students

The Architecture, Construction, and Engineering Students (ACES) Program provides minority students from disadvantaged communities the opportunity to co-enroll in high school and community college Science, Technology, Engineering, Art, and Math (STEAM) courses. These courses help prepare students for future careers in STEAM fields, including energy efficiency. ACES is available at participating schools.
