

Email to Co-op contractors sent 5/1/2017:

*Update Regarding SoCalREN Contractor Co-op Program*

*SoCalREN values all the Participating Contractors engaged in the Energy Upgrade California® Home Upgrade program and your dedication to driving energy efficiency into customer homes. We must always have the best interest of utility ratepayer funds we manage; reviewing the performance of the programs we offer to ensure there is a strong return on investment of ratepayer funds is imperative. We are currently reviewing the effectiveness of the Contractor Co-op program and determining the direction of the program to align with new statewide Energy Upgrade California logos, and until further notice, new applications will not be accepted. Any current applications in progress will be honored; an Account Manager will contact you to discuss.*

*We apologize for any inconvenience and plan to have an update by the end of May as to the continuation of the offering and/or new guidelines for Participating Contractors.*
